Encapsulation Builder – Steps

1. Install and open Wireshark.
2. Select Wi-Fi interface and start capturing.
3. Open Google, YouTube and Wikipedia.
4. Wait 30 seconds and stop capturing.
5. Apply TCP, UDP and ICMP filters.
6. Apply tcp.len > 0 filter.
7. Inspect TCP packet headers.
8. Inspect UDP packet headers.
9. Calculate header overhead and payload efficiency.
10. Fill the observation table.
11. Save the capture file in .pcapng format.
12. Open the saved capture file.
13. Apply ICMP filter and observe packets.
14. Write the seven questions and answers.
